Tire Pressure Monitoring System

## Safety First

Set button  
Tire pressure  
LED indicator  
Tire indicator

Lockable  
Wireless  
valve sensors

### Monitoring tire pressure

- Slow leaks
- Tire leaking warning
- High tire temperature
- Excess pressure
- Avoid blowouts

### Save fuel & reduce emissions

Continuously monitoring tire pressure to maximize fuel economy

### Reduce wear & extend tire life

Correct tire pressure extends life span of tires and reduces uneven tread wear.

### DIY installation

- External valve sensors
- Power socket wireless display
- Theft deterrent locking system

### Government Legislation

The U.S. Government legislated mandatory installation of TPMS in all new cars in 2007.
